

Assembly Bill 827

Customer Access to Recycling Guide

As of July 1, 2020, Assembly Bill (AB) 827 requires food generating businesses to make food waste and recycling bins accessible to customers.

Compliance Requirements

- Recycling and organics collection containers must be placed adjacent to trash containers.
- Containers must be visible, easily accessible, and clearly marked.

Full service restaurants are not required to provide containers to patrons but must provide containers for employees to separate post-consumer recyclables and organics for customers.

Model Signage

The California Department of Waste and Recycling Resources provides examples of model signage at the following webpage:
