City of Eastvale Officially Launches Automated Permit Portal

EASTVALE, CALIF. – Earlier this month the City of Eastvale officially launched SolarAPP+, making Eastvale one of the first cities in the State of California to integrate this software into its services! Solar APP+ is an automated residential solar and storage systems approval platform. When applicants submit solar plans through SolarAPP+, they can receive a permit instantly as long as their system meets the requirements of SolarApp+ and the Building Code.

Developed by the National Renewable Energy Laboratory, SolarAPP+ will lower costs and expedite solar installations, encouraging property owners to invest in generating renewable and sustainable energy. SolarAPP+ streamlines and automates permit reviews.

Community Safety Director Johnny Terfehr expressed his excitement for the new permit portal, sharing what a positive impact it will have. “The City of Eastvale is committed to the expansion of online services and SolarAPP+ is a perfect example of that commitment. It will streamline the solar permit process, saving time for residents and staff.”

Overall, this will be a positive addition to the community and the City of Eastvale is eager to see how it will improve our community services.

To learn more about SolarAPP+ or to submit a solar permit today, please visit their [website](#).

###

About the City of Eastvale

The City of Eastvale was founded on October 1, 2010 as an independent local government agency, governed by a five-member, elected City Council. The City of Eastvale serves over 73,700 residents and encompasses 13.1 square-miles in western Riverside County. Eastvale is a young and dynamic community filled with economic opportunity, tremendous growth, and strong values.
