

# CONSTRUCTION & DEMOLITION RECYCLING PROGRAM

The California Green Building Standards Code (CalGreen) requires building projects to divert at least 65% of construction and demolition (C&D) debris, 100% of inert (rock, dirt, concrete, asphalt), and 100% of landscape debris away from the landfill by either recycling, donating, or reusing materials.

To comply with this requirement, the C&D Waste Management Plan and Waste Management Report must be completed and submitted to [recycle@eastvaleca.gov](mailto:recycle@eastvaleca.gov).

**Please follow the steps below to ensure that your project is in compliance with State requirements.**

## 1 COMPLETE C&D WASTE MANAGEMENT PLAN

Prior to the start of your project, you will need to complete the Construction and Demolition Waste Management Plan. This Plan identifies project information, expected construction and demolition debris, and hauling methods. Please note, materials may only be self-hauled or hauled by Waste Management. To arrange for hauling services through Waste Management, please contact (800) 423-9986.

## 2 COLLECT AND SAVE RECYCLING RECEIPTS

Remember to collect and save all recycling and disposal receipts after each load of material is removed from the job site. Upon completion of your project, copies of the tickets and documentation will need to be submitted to [recycle@eastvaleca.gov](mailto:recycle@eastvaleca.gov) for approval.

## 3 COMPLETE C&D WASTE MANAGEMENT REPORT

Wonderful! Your project is complete! In order to complete the waste diversion component of your project, you must fill out and submit the C&D Waste Management Report and submit all recycling receipts to [recycle@eastvaleca.gov](mailto:recycle@eastvaleca.gov).

**We're Here  
to Help!**

The City of Eastvale is here to ensure your project is compliant with State diversion requirements. For any questions or concerns, please contact us at [recycle@eastvaleca.gov](mailto:recycle@eastvaleca.gov).
